

Mission Statement

Our Corporate Values

We create added value for our customers

We work safely

We offer trust and show appreciation

We are sustainable

Corporate Policy for Our Integrated Management System Related to Quality, Environment/Energy and Occupational Health/Safety

The Company is committed to:

- Promoting a respectful interaction with employees, business partners, owners and all stakeholders involving them in safety, health and environmental protection issues
- Complying with all applicable legal obligations as well as our regulatory framework and other requirements, along with the involvement and consultation of the relevant officers
- Ensuring the proper conduct in the organization according to our ethics code
- Ensuring continuous improvement within the management system and quality while providing the necessary resources for this process
- Evaluating and safeguarding product safety risks, as well as customer specific requirements in the conceptual and developmental phases collectively with our customers
- Continuously improve environmental/energy performance while reducing or preventing the carbon footprint and related environmental impacts, in order to contribute to the conservation of resources and environmental protection; the procurement of sustainable products and services is important
- Providing health and safety in the workplace in order to prevent work-related injuries and illnesses and to generally motivate employees to lead a healthy lifestyle
- Maintaining long-term partnerships with customers, suppliers and other applicable institutions
- Living the values of diversity, inclusion and gender equality
